EXPERIENCE

Restaurant Management System (Team Project)

February 2026 - March 2026

- Built a unified platform that synchronizes table status changes and order processing queues from the kitchen to the cashier.
- Structured the codebase utilizing the CodeIgniter framework to maintain clear logical separation and improve application scalability.
- Programmed secure management modules to handle menu configurations, multi-tier user permissions, and transactional records cleanly.

Library Management System (Team Project)

October 2025

- Designed and implemented a real-time book tracking system and automated overdue fine calculation features using MySQL database triggers and stored procedures.
- Developed the application using native PHP MVC architecture and integrated Prepared Statements to protect database queries from SQL injection.

Admin Dashboard Pharmacy Management (Team Project)

March 2025

- Developed the core layout for the Add Medicine and Stock Medicine modules using HTML and CSS.
- Created clean product card displays to help users track medicine prices and stock levels easily.
- Styled the dashboard to ensure the pages adapt properly to different screen sizes.

EDUCATION

Center for Computing and Information Technology Universitas Indonesia

2024 - Present

Information Technology
organization: Staff Creative Visual Komunitas Android CCIT-FTUI

Pesantren Umar Bin Khatab Plus

2021 - 2024

IT Boarding School
